HOW TO GET YOUR OPENAI API KEY

THIRD-PARTY USAGE COST EXAMPLES

05/16/2025

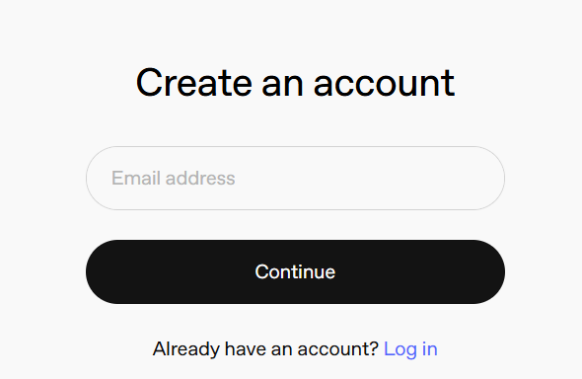

1

Create or Sign In to Your OpenAI Account

- Go to: https://platform.openai.com/

- Click **Sign In** (if you already have an account) or **Sign Up** to create one.

- You will need to provide an email address and phone number for verification.

2

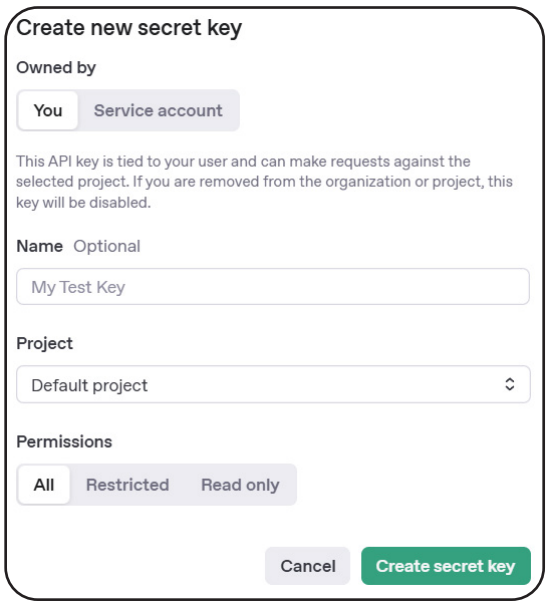

Go to the API Keys Page

- After logging in, go to the API keys section directly here:
  https://platform.openai.com/account/api-keys

3

Generate a New API Key

- Click the **“+ Create new secret key”** button.
- Give your key a name (optional, but helpful for organizing).
- Click **Create secret key**.
- **Copy your key now** — this is the only time you’ll be able to see the full key.
- If you lose it, you’ll need to generate a new one.

Important Notes

- **Copy and Store Securely:** Copy the generated API key and store it in a secure location. This key is sensitive information and should be treated like a password.
- **Security:** Keep your API key confidential. Do not share it to any others
- **Usage:** Be mindful of your API usage and any associated costs. OpenAI may have usage limits or billing based on API requests.
- **Regeneration:** If you suspect your API key has been compromised, delete it and generate a new one immediately.

4

Add Payment Details

To activate full access to the OpenAI API, you must add **a valid payment method**. The free trial credits (if available) may not be sufficient for actual usage, especially for GPT-4 or larger models. Without a payment method, your API requests may fail or be blocked.

- Go to the Billing Overview page: https://platform.openai.com/settings/organization/billing/overview
- Click “Add payment details.”
- Enter your credit/debit card details and billing information.
- After adding the payment method, your account will be activated for billable API usage.

Usage, Billing, Third-party Usage Cost Examples

- **Usage is billed** based on how much you use (tokens, model type, etc.). As May 16 2025, EcoCircuitAI uses gpt-4o and DALL·E 3 for foundational models.
